SHIPPING—Our express and motor freight connections are excellent. We suggest you use motor freight for all shipments, but prefer that you state which way you wish your order shipped. In the absence of directions we will use our judgment in making shipments, but in doing so we assume no responsibility whatever. **All goods travel at the purchaser's risk and expense.**

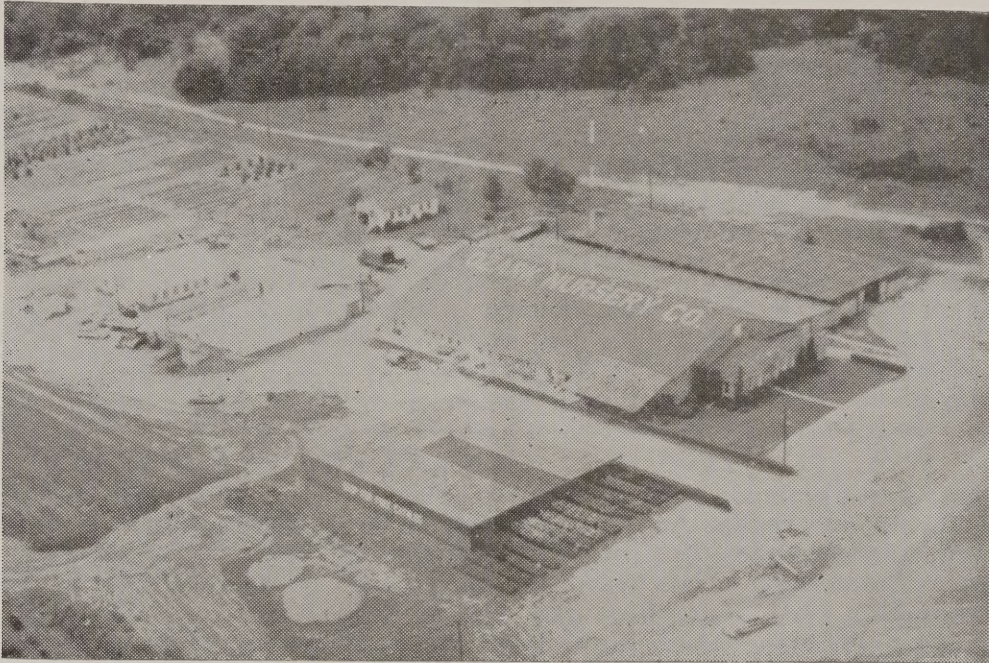

TRUCK DELIVERY—Bulk truck deliveries to customer's place of business can be made to many points at rates as low, or lower, than local freight rates. If you prefer to call for your stock with your own trucks we should have advance notice so we can have the stock ready.

CAUTION—We accept all orders subject to crop conditions and on condition that same shall be void should injury befall our stock from hail, fire, frost, error in count or other causes beyond our control. All orders are accepted without liability for non-performance if labor shortages or delay in transportation should prevent us from making delivery.

NON-WARRANTY—We give no warranty, express or implied as to life or productiveness of stock we sell. It is mutually agreed that our liability for stock proven untrue to name shall be limited to replacement or refund of original purchase price. All contracts subject to crop.

CLAIMS—All claims for any cause must be made immediately upon receipt of goods. We will not entertain claims which are filed after goods have been accepted or which are not made in writing within five days after arrival.

SPECIAL NOTICE—Correspondents are requested to use their printed business letterheads. We do not quote wholesale prices to retail buyers. We use every effort to limit the distribution of trade prices to those whom we know to be entitled to receive them.

A view of our 125 x 160 cold storage where your plants are kept in perfect condition until you are ready for them. Close by is another storage building 120 x 200. This is only part of the many facilities that Ozark uses to assure you the finest stock obtainable.

HOWARD'S MIRACLE PLUM

Plant Patent No. 721

The introduction of this grand, new fruit, marks a new era in the advancement of fine fruits for the table. The tantalizing and delicious flavor, the great size, the firm amber flesh, combined with red and yellow maple leaved color, places the "HOWARD'S MIRACLE" in a class by itself.

Those fortunate enough to have eaten this fruit offer various comments as to its flavor. Some say the taste is like Pineapple, others compare the taste to a Peach, Plum, and Nectarine combined. Invariably, after tasting the "HOWARD'S MIRACLE" comes the exclamation, "This fruit is truly a MIRACLE!" "HOWARD'S MIRACLE" is even more delicious in preserves. The skin is thin and unnoticeable when eating, while the meat is Nectarine-like in quality. Although "HOWARD'S MIRACLE" is extra-ordinarily large, averaging 2½ to 2¾ inches, the seed is only miniature.

Beautiful for lawn planting, foliage becomes richly tinted in the Fall, similar to a Maple. Very hardy, and with the National Advertising it is receiving, it is sure to be a top seller.

CARPATHIAN ENGLISH WALNUTS

A new hardy strain comes from the Carpathian mountains in Poland. Thin-shelled and fruited here in Cherokee County last year. Our trees are propagated from a selected tree which started bearing young and bears heavily and regularly. Will stand cold weather and develops into large specimen trees. One of the fastest selling items that we retail. Besides being a fast seller, it will make you a good profit.

MORaine LOCUST (Plant Patent No. 836)

A round-headed tree when young, but grows tall and vase-shaped when older. Grows more rapidly than common locust because there are no seed pods or thorns. This attribute along with small leaves which mostly drift into the lawn between the blades of grass practically eliminates the necessity of a Fall clean-up. Stands pruning well, but seldom needs any. Transplants easily.

SUNBURST LOCUST (Plant Patent No. 1313)

The first new color in trees in decades. Brilliant golden foliage on the tips of the branches contrasts beautifully with the rich green of the balance of the tree, making it appear to be in bloom all summer. With its broadly pyramidal head and excellent branching habit, it is a very symmetrical tree. There are lovely white blossoms in the Spring, but no unsightly seed pods to mar the beauty of the tree or lawns.

BROADLEAF EVERGREENS

All evergreens grown by us are transplanted stock, field grown, and all have been grown with plenty of room for development. Our soil is especially suitable for balling. Although we cannot assume responsibility for results, our evergreens have given good results throughout Oklahoma and surrounding states. All evergreens are priced balled and burlaped (B & B). All trees have been skillfully sheared to make them symmetrical and compact.

KURUME AZALEAS

The Kurume Azaleas become completely covered in Spring with blossoms making them the most showy of all flowers for the garden. They are more dwarf in their habit of growth and not quite as hardy as the Japanese Azaleas. Yet, they have stood as much as 14 degrees below zero here in Tahlequah without any damage. Azaleas prefer partial shade and acid soil. Should be planted on East or North side for best results. Roots are near surface and should be kept cool and damp by using a two to four inch mulch of peat moss. Do not cultivate. An ideal fertilizer is cottonseed meal but do not put in hole when planting.

EVERGREENS

All Evergreens grown by us are transplanted stock, field grown, and all have been grown with plenty of room for development. Contrary to most Southern Growers, our Junipers are thick and full. They are 4, 5, and 6 years old and have been sheared heavily and skillfully to make symmetrical and compact plants. We guarantee them to please any Northern buyer and we challenge anyone to grow better quality. To aid you in making more sales, each evergreen is individually tagged with its name and a space is left for you to mark your own selling price.

Our soil is especially suitable for balling. Although we cannot assume responsibility for results, our evergreens have given good results throughout Oklahoma and surrounding states. All evergreens are priced balled and burlapped. (B & B)

ROSES
California Grown

We now have our own roses growing in West Covina, California, and they are available for shipment from Tahlequah in early January. They are skillfully grown, carefully sprayed during the growing season and are dug only when well-matured. They are carefully graded under our personal supervision and with our excellent storage facilities we are in a position to supply first class plants which give satisfaction.

CHRYSLER IMPERIAL

(Patent No. 1167) (Retails for \$2.50 each; 3 or more at \$2.20 each). Vivid rich tones of crimson are enhanced by darker overtones of glowing oxblood red, and the gem-like luster of garnet in the folds retains its sparkling beauty. Long tapering buds unfold even in adverse weather, opening to large, high-centered flowers measuring 4½ to 5 inches with 40 to 50 wide petals. These are borne on sturdy, medium long stems. The opening of each glorious rose is a thrilling spectacle of changing iridescent shades of red. A compact and symmetrical grower with abundant, dark green, semi-glossy foliage. AARS winner in 1953.

No. 1	1.40	1.25	1.20	1.10
No. 1½	1.12	1.00	.96	.88

FIRST LOVE

(Patent No. 921) (Retails \$2.25 each; 3 or more at \$2.00 each.) The long slender delicate pink buds open to full blossoms that are delicately tinted with shades of salmon, orchid, and rose. Mildly fragrant. Ideal for cut flowers.

Patented Floribunda Roses

CIRCUS

(Patent No. 1382) (Retails at \$2.50 each; 3 or more at \$2.20 each). New multicolor floribunda and only Winner of AARS Award for 1956. The pre-dominant color is yellow with the tight buds richly marked with red. As the blooms unfold, they offer an ever-changing succession of delightful shades with the fully blown flowers putting on a finishing flourish of bright scarlet. Changing colors—yellow, orange, scarlet, buff, apple blossom pink and red makes it unique in the rose world. Medium height, about 28 inches, compact, handsomely foliaged, it fits beautifully into the garden as a colorful border, massed in beds, or planted singly. Stems are straight and sturdy, fine for cutting. Flowers borne in clusters. Fragrant.

ROSES—(Continued)

JIMINY CRICKET

(Patent No. 1346) (Retails for \$2.00 each; 3 or more at \$1.75 each.) A Floribunda which features tangerine red buds, opening to coral-orange and finishing in a pink coral which is close to the color of Fashion. It has a pleasing old rose fragrance reminiscent of the Hybrid Tea Class. Foliage is glossy bronze in the early stages and at maturity turns to a lush glossy green. The vigorous upright growth makes Jiminy Cricket ideal for hedges and its prolific blooming habit qualifies it as an outstanding color mass or border edge. When cut, the flowers hold well for household arrangements.
